Ideation Phase

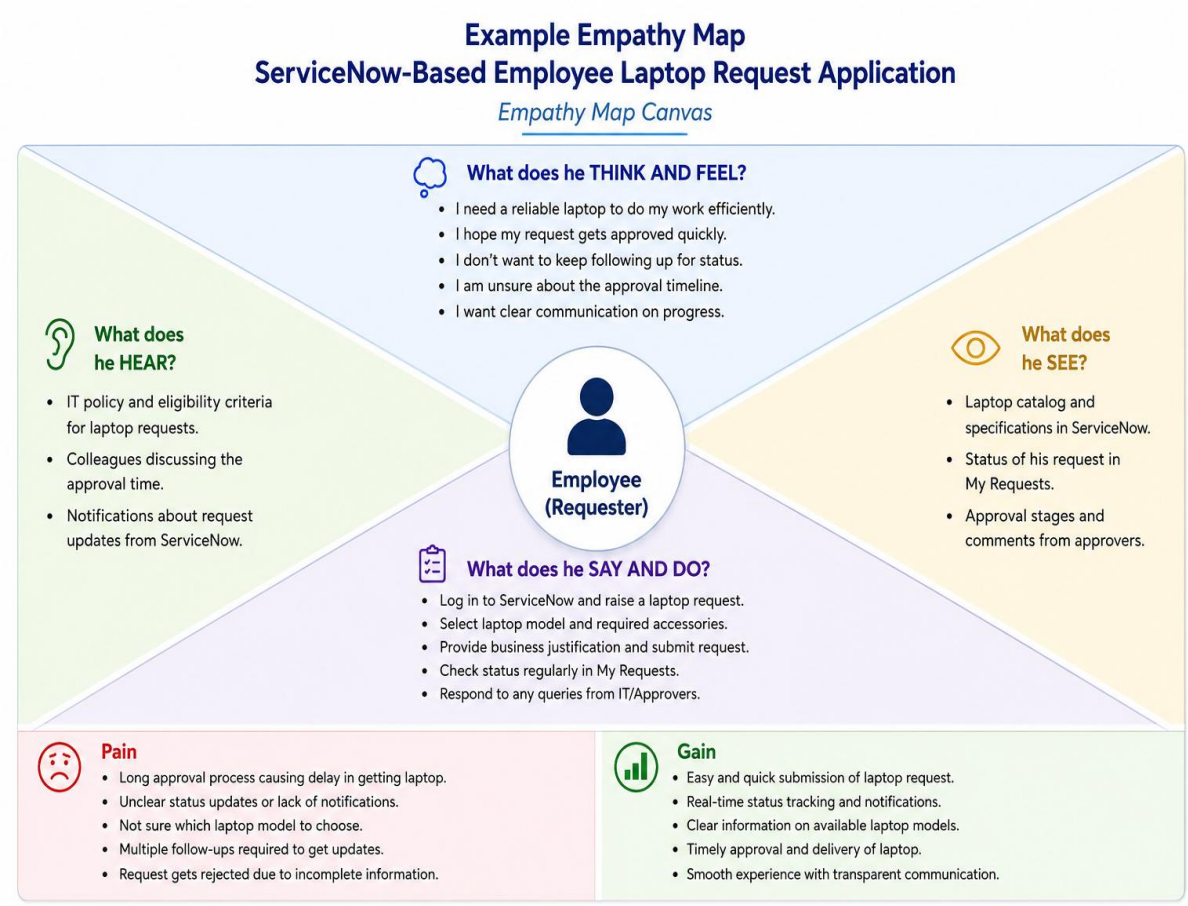

Empathize & Discover

Date	September 2026
Project Name	ServiceNow-Based Employee Laptop Request Application

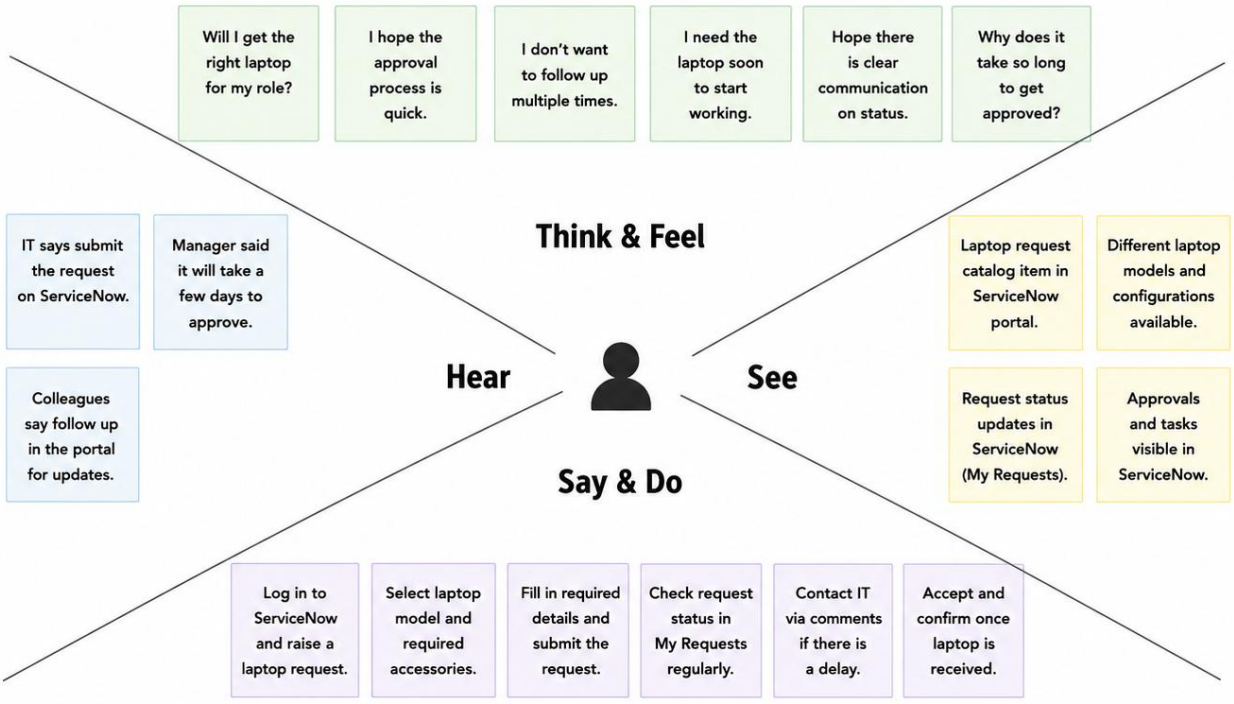

Empathy Map Canvas:

This Empathy Map Canvas is created specifically for the ServiceNow-Based Employee Laptop Request Application. It helps understand the needs, expectations, behaviours, challenges, and goals of employees requesting a company laptop.

The map focuses on the employee request journey, including selecting a laptop, submitting the request, approval processing, status tracking, communication with IT, and final laptop delivery. These insights support the design of a simple, transparent, secure, and efficient ServiceNow application.

ServiceNow-Based Employee Laptop Request Application

Pain

- Long approval process and delays.
- Unclear status updates or lack of notifications.
- Limited visibility on expected delivery date.

Gain

- Quick and streamlined request submissions.
- Real-time status tracking and notifications.
- Receive the right laptop on time to start work productively.
