Project Design Phase-II
Data Flow Diagram & User Stories

Date	September 2026
Project Name	ServiceNow-Based Employee Laptop Request Application

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. It shows how data enters and leaves the system, how requests and approvals are processed, and where information is stored.

Example: (Simplified)

Project data flow:

1. Employee submits a laptop request with required specifications and business justification.
2. ServiceNow validates the request and stores request details.
3. Approval workflow routes the request to the manager/authorized approver.
4. Approval or rejection updates the request status and triggers notifications.
5. Approved requests are handled by IT for asset availability, assignment and delivery tracking.

User Stories:

Use the below template to list the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee	Laptop Request	USN-1	As an employee, I can submit a laptop request by selecting the required laptop model/configuration and providing business justification.	Request is submitted successfully with all mandatory details.	High	Sprint-1
Employee	Laptop Request	USN-2	As an employee, I can view the status of my laptop request after submission.	Current request status is visible in My Requests.	High	Sprint-1
Employee	Tracking & Notifications	USN-3	As an employee, I can receive notifications when my request is submitted, approved, rejected or updated.	Notification is generated for each relevant status change.	High	Sprint-1
Manager / Approver	Approval Management	USN-4	As an approver, I can review laptop request details and approve or reject the request with comments.	Approval decision and comments are recorded against the request.	High	Sprint-1
IT Support	Fulfillment	USN-5	As an IT user, I can check asset availability and assign an available laptop to the employee.	Asset assignment is recorded and linked to the request.	High	Sprint-2
IT Support	Fulfillment	USN-6	As an IT user, I can update delivery and handover status for an approved laptop request.	Delivery/handover status is updated and visible to the employee.	Medium	Sprint-2
Administrator	Security & Access	USN-7	As an administrator, I can control access to request data based on user roles and groups.	Only authorized roles can view or update protected data.	High	Sprint-2
IT Manager	Reporting	USN-8	As an IT manager, I can view request, approval and fulfillment reports.	Reports display accurate request and processing information.	Medium	Sprint-3
Employee	Request History	USN-9	As an employee, I can view my previous laptop requests and their approval history.	Request history and relevant status details are available.	Medium	Sprint-3
IT Support	Validation	USN-10	As an IT user, I can validate request information before fulfillment.	Incomplete or invalid requests are flagged before fulfillment.	Medium	Sprint-2

Key project users: Employee (Requester), Manager/Approver, IT Support/Fulfillment Team, and Administrator. These roles participate in request submission, approval, tracking, fulfillment, security and reporting.
